# Introduction

This document is a Facilities Master Plan Update (FMP) for the Gadsden Independent School District (GISD). The intent of the plan is to guide capital planning decisions to support the district's educational mission and meet state adequacy standards. The Public School Capital Outlay Council (PSCOC)/Public School Facilities Authority (PSFA) requires that all New Mexico public school districts have a five-year facility master plan as a prerequisite for eligibility to receive state capital outlay assistance. This master plan is an update to the 2016-2020 Facilities Master Plan and is in accordance with guidance issued by the PSCOC/PSFA.

The Facilities Master Plan serves as a flexible tool to present issues to the community, board of education, and district staff for input and revision on a periodic basis. Preparation of the FMP used a systematic process that strives to identify needs and wisely allocate capital resources to bring district facilities up to state adequacy standards and district policies with respect to:

- Life/health/safety
- Educational/programmatic needs (additions and remodeling to meet various educational standards) and curriculum needs
- Renewal needs (replacement schools, remodeling, refurbishing, planning studies, deferred maintenance, and major system replacement)
- Provision for necessary growth (new schools, additions, remodeling, site acquisition, and design planning studies)
- Educational technology

The FMP addresses four major questions:

- Where do we want to be? – identifies district facility goals.
- Where are we now? – identifies the adequacy of district facilities and capacity to meet future needs.
- Where we are going? – analyzes information about future enrollment, program changes, classroom needs and financial resources.
- How do we get there? – identifies the gaps between existing conditions and the ideal future state, develops a strategy to meet needs, and presents a prioritized list of capital projects.

The master plan is comprised of four sections:

- **Section 1 – Goals / Process** provides information about district goals and the master planning process.
- **Section 2 – Existing and Projected Conditions** provides information about district facilities, demographics, enrollment, technology and capital resources.
- **Section 3 – Capital Improvement Plan** provides information about capital needs, district priorities and capital strategies.
- **Section 4 – Master Plan Support Material and Appendix** provides detailed information about district school and support facilities, growth/enrollment/utilization, facility evaluation and cost estimating data.

# 1 Goals and Process

*This section discusses the goals for the desired future state of the district's educational programs and facilities and the process for developing the facilities master plan.*

## 1.1 Goals

This section has no changes.

All of the district policies, Educational Plan for Student Success (EPSS), and the 2016-2019 Technology Plan are available on the district's web site at: <http://www.gisd.k12.nm.us/>.

### District Mission Statement

The Gadsden Independent School District will ensure that all students will learn by putting education first. The district will provide quality educational opportunities conducive to learning that will facilitate students' individual goals.

### Physical Plant Mission Statement

The GISD Physical Plant Department will provide an optimum learning and working environment through improvement of work efficiency, employee accountability, and constant pursuit of quality for all GISD students and staff.

## 1.2 Process

There are no changes in the process.

### GISD FMP Committee

- Rafael Gallegos - Executive Director of Energy Management and Construction
- Alfredo Holguin - Superintendent for Support Services
- Jessica S. Herrera - Physical Plant Director

The 5-Year Facility Master plan was approved by unanimous vote of the Gadsden Board of Education at the regular Board meeting on December 10, 2015, and the minutes approved it at the regular Board meeting on January 14, 2016.

The 2017 Update was approved by the Gadsden Board of Education at the regular Board meeting on August 10, 2017.

The 2018 Update was approved by the Gadsden Board of Education at the regular Board meeting on February 14, 2019.

The 2019 Update was approved by the Gadsden Board of Education at the regular Board meeting on ???

*This section defines abbreviations and uncommon terms.*

<b>ARC</b>	Architectural Research Consultants, Incorporated
<b>ACS</b>	American Community Survey (US Census Bureau)
<b>CDP</b>	Census Designated Place
<b>CRRUA</b>	Camino Real Regional Utility Authority
<b>EPSS</b>	Educational Program for Student Success
<b>ES</b>	Elementary school
<b>FMP</b>	Facilities master plan
<b>GISD</b>	Gadsden Independent School District
<b>G.O. bond</b>	General obligation bond
<b>GPS</b>	Geospatial and Population Studies (UNM)
<b>GSF</b>	Gross square feet, or the sum of net assignable square feet plus all other building areas that are not assignable. This “left over” area is called “TARE.” TARE includes areas such as hallways, mechanical areas, restrooms, and the area of interior and exterior walls.
<b>HS</b>	High school
<b>HVAC</b>	Heating, ventilation and air conditioning
<b>IMMEX</b>	Maquiladora program in Mexico
<b>IT</b>	Information technology
<b>K</b>	Kindergarten
<b>MS</b>	Middle school
<b>MVEDA</b>	Mesilla Valley Economic Development Alliance
<b>NAFTA</b>	North American Free Trade Agreement
<b>NMCI</b>	New Mexico Condition Index
<b>Pre-K</b>	Pre-kindergarten
<b>PSCOC</b>	Public School Capital Outlay Council
<b>PSFA</b>	Public School Facilities Authority
<b>RTC</b>	Residential Treatment Center
<b>UNM</b>	University of New Mexico
<b>WSMR</b>	White Sands Missile Range

## 2 Existing and Projected Conditions

*This section provides an overview of the district's current educational programs and facilities configuration, and community involvement.*

### 2.1 Programs

Pre-K programs are now full day for four-year olds and half-day for three-year olds.

#### 2.1.1 Number of Schools, Types and Grade Configuration

The district maintains 28 school facilities and three administration/support facilities on 26 sites and one closed facility. District facilities are located throughout the district in several communities.

The Gadsden Independent School District had the fourth largest enrollment in the state for the 2019-2020 school year. District enrollment (2019-1920 40-day) was 12,720 students in grades pre-K-12, including students in Homebound/Hospital and Residential Treatment Center.

School configurations are:

- Pre-Kindergarten - 4 schools, grades pre-K
- Elementary School - 13 schools, grades pre-K-6  
3 schools, grades K-6
- Middle School - 3 schools, grades 7-8
- High School - 4 schools, grades 9-12
- Alternative School - 1 school, grades 9-12

- Charter School - none

#### 2.1.2 Assumptions / Anticipated Changes in Programs

The district has an established goal of limiting enrollment at schools as follows:

- Elementary schools - 550 students maximum
- Middle schools - Less than 1,000 students
- High schools - 2,000 students maximum

Currently, enrollment at three of the district's 16 elementary school facilities exceeds the standard.

At this time, the district plans no further educational program changes that impact facilities.

#### 2.1.3 Shared / Joint Use Facilities

This section has no changes.

---

## 2.2 Sites / Facilities

### 2.2.1 Location

The district boundaries changed again, between La Union Elementary School and Santa Teresa Elementary School. Please see the Appendix for a map of the updated borders.

### 2.2.2 Existing Facilities

The district has slightly over 2.271 million gross square feet in permanent school facilities and 157,912 gross square feet of portable facilities. The schools are comprised of 36 permanent buildings and 42 portable buildings.

The district's school sites equal somewhat over 601 acres.

Administration and support facilities equal 155,861 gross square feet in permanent facilities and 18,520 gross square feet in portable facilities. The district's administration sites equal about 44 acres.

Surplus property consists of 31,226 gross square feet of permanent facilities and 10,640 gross square feet of portable facilities on 9.9 acres.

The total inventory of district facilities has somewhat over 2,614,463 gross square feet of buildings and 655 acres of land.

The oldest school facility in the district was built in 1921. The newest school facility opened in 2018. School facilities range in age from 2 to 98 years old.

The district is considering re-purposing San Miguel Elementary School.

See Exhibit 2-1 for an overview of district facilities.

## 2.2.3 Facility Evaluation

No additional evaluations were conducted.

The State of New Mexico ranks each school facility with respect to all other facilities in the state and assigns a condition index value. The condition index value (NMCI) is a composite value derived from the cost of physical and

programmatic deficiencies related to the replacement cost of the facilities. Exhibit 2-2 shows the 2019/2020 PSFA ranking and NMCI values from the greatest need (lowest ranking number) to the least need (highest ranking number), according to the State's revised system and the change in ranking from the previous year.

*Exhibit 2-2

## 2.3 District Growth

*This section discusses growth trends in the district, including demographic, economic, and development factors that may impact district educational programs and student enrollment.*

### 2.3.1 Introduction

This section provides an analysis of various types of demographic and growth data, including:

- Overall population trends
- Birth rates
- Age composition
- Development activity
- Economic trends

These factors, along with historical enrollments, provide a basis for district student enrollment projections. We use enrollment projections, along with classroom utilization patterns, to identify:

- Future classroom needs
- Future site capacities

### 2.3.2 GISD Area Population Growth Trends

GISD encompasses a large geographic area

*GISD borders of southern Doña Ana County, NM, bordering El Paso County, Texas (pop. 682,669, Census Population Estimates, 2018)), and Ciudad Juarez (pop. 1,321,004) in Chihuahua, Mexican. The school district consists of two main regions with several distinct,*

*large, influential populations in the north (Las Cruces, with a population of 101,000) and south (El Paso and Ciudad Juarez, with a combined population of 1.97 million).*

small and mid-sized communities.

Mesilla Valley, in the northern part of the district, supports agriculture and farming and is heavily influenced by the city of Las Cruces (population 102,926), directly to its north. The southern portion of the district is closely associated with El Paso and the manufacturing district of Ciudad Juarez. This area includes the communities of Sunland Park and Santa Teresa, west of El Paso, and Chaparral to the north.

Doña Ana County is New Mexico's second largest county by population (217,522 in 2018), and supports some of the strongest growth in the state. The City of Las Cruces is Doña Ana's major metropolitan area and the Gadsden school district (population 64,658 in 2017, ACS 2018 update to 2017 estimate) makes up about one-third of the total county population.

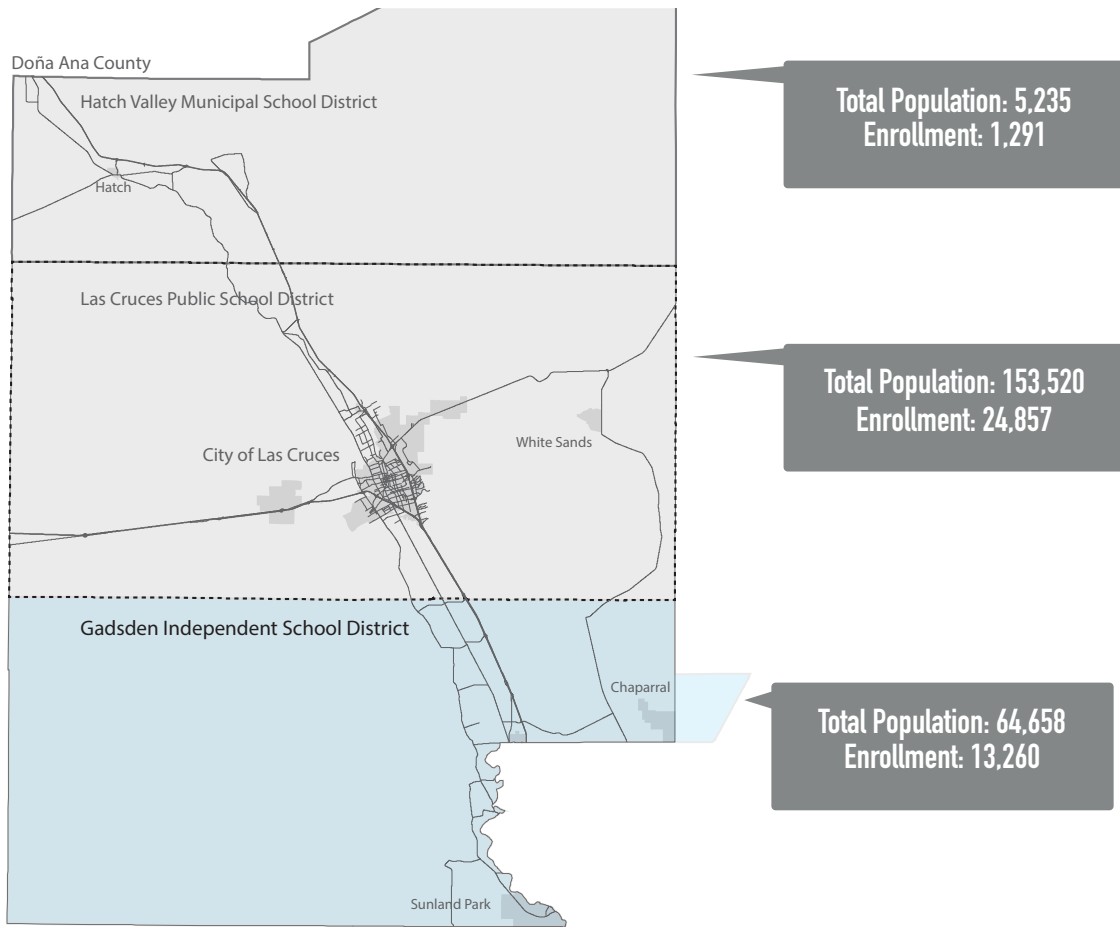

*Doña Ana County is New Mexico's second largest, and continues to grow.*

### Population Growth

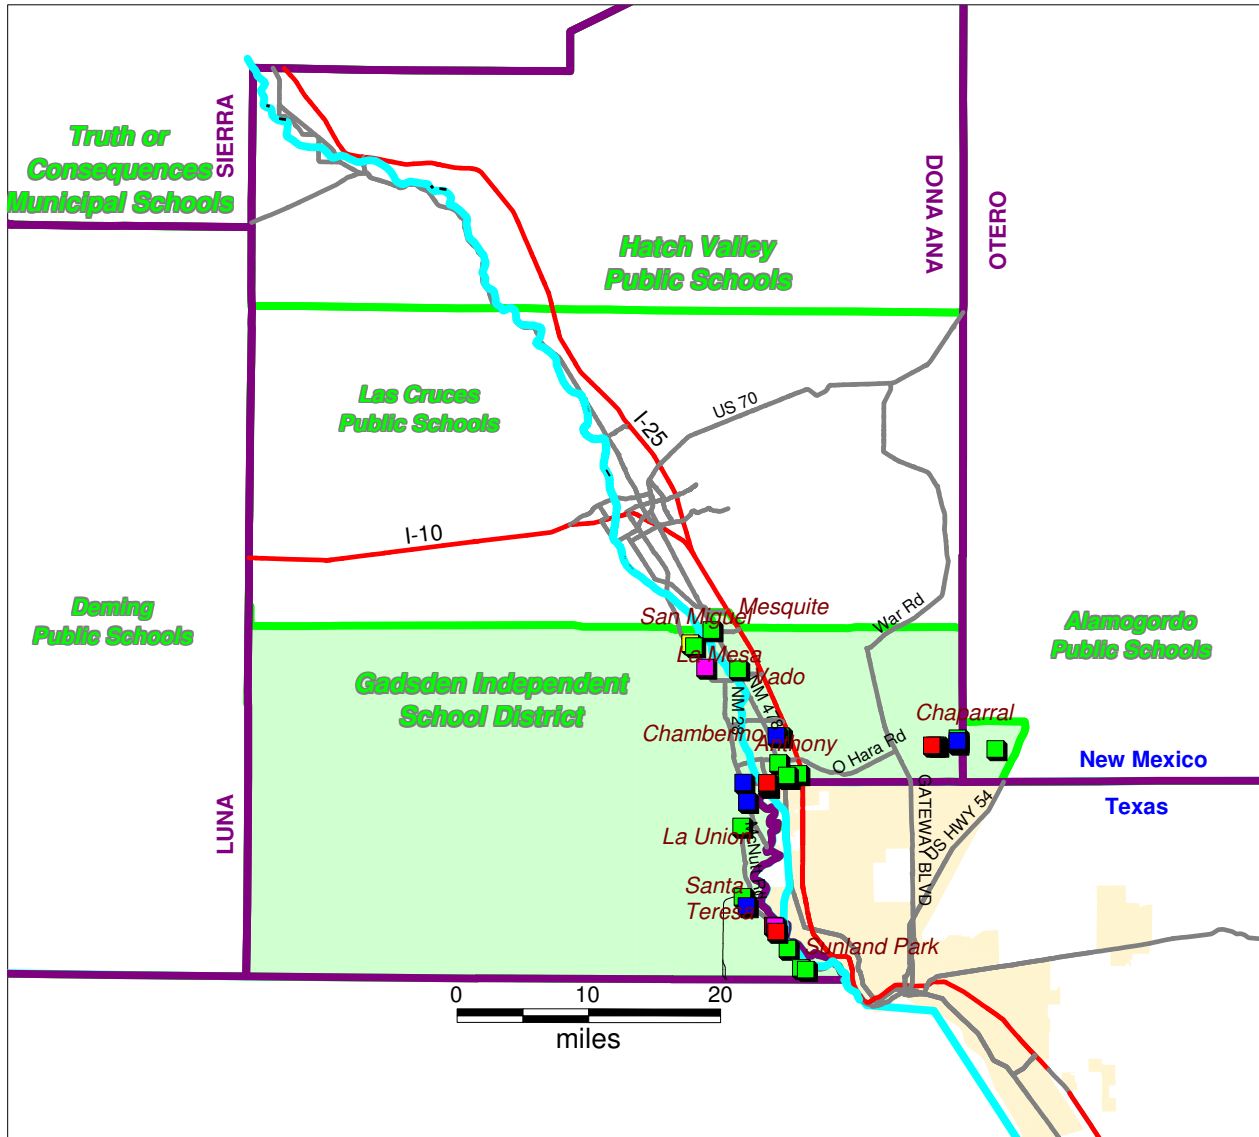

From 1990 to 2000, Doña Ana County grew at an annual average rate of 2.6%, with growth in the Las Cruces area at 4.2%. From 2000 to 2010, the rate of growth in the Gadsden area increased, while growth in Las Cruces and the county as a whole slowed. Most communities in Gadsden grew in this period. Chaparral grew at the fastest rate.

From 2010 to 2017, growth in the county fell below 0.5%, according to U.S. Census estimates; Gadsden growth fell to 1.19%, just above Las Cruces (0.69% average annual growth). Sunland Park remained the sole area of growth in the district.

*Boundary changes account for some population changes between 2000 and 2010 in Chaparral, Anthony, Berino, Camberino and Santa Theresa. Boundaries did not change in Mesquite and Vado from 2010 to 2017.*

***Doña Ana County Population Projections***

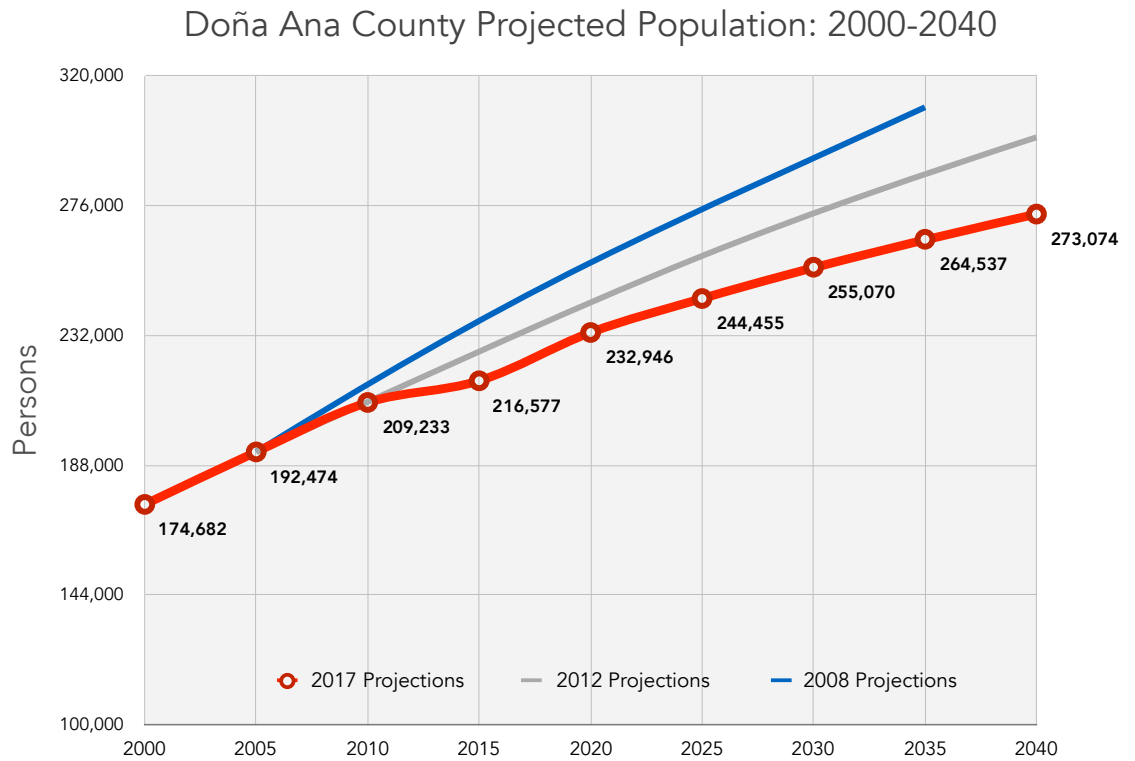

In 2017, the University of New Mexico's Geospatial and Population Studies (GPS) updated its population projection series for New Mexico counties. Previous GPS projection series were published in 2008 and 2012. The 2017 series projected significantly lower growth for most New Mexico counties than did the 2008 series, including for Doña Ana County. The 2017 series projected that county population will grow by about 70,000 to 273,074 by 2040, at an 0.89% average annual growth rate, down from 1.3% projected in 2008.

*Las Cruces growth was strong, but declined sharply from 1990 to 2017.*

*Gadsden growth increased in the 2000s, even as it slowed significantly elsewhere in the county.*

*The district continues modest growth.*

 2017*

### 2.3.3 Births and Birth Rates

A central factor determining population growth is births and birth rate. The number of births in Doña Ana County trended up during the 2000s from 2,917 in 1999 to 3,323 in 2010 but have declined since to 2,587 in 2018, even as the population has grown by over 8,000 in the same period.

GISD area births accounted for about 30% of births in the county, but fell slightly from 1,033 in 2010 to 800 in 2018.

Births in Anthony, Mesquite, and Santa Teresa have trended slightly up in the last three years, while other areas in GISD have trended down.

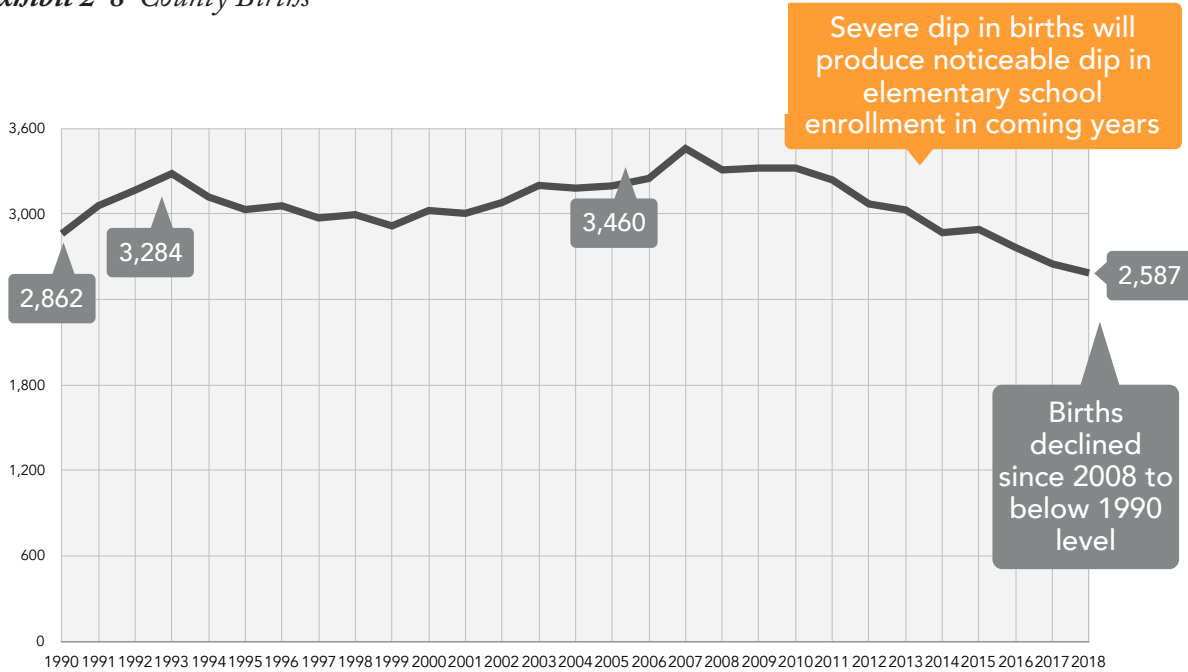

Birth rates (births per 1,000 population) in the U.S. and New Mexico are declining. The birth rate in Doña Ana County has also declined, but remained slightly higher than the state and national averages in 2018. Down from 21.1 in 1992, the county birth rate in 2018 was 11.98, just above the state and national averages of 11 and 11.6, respectively.

**In 2018 there were 438 fewer children born in Doña Ana County than in 2000- even though there were 42,840 more residents.**

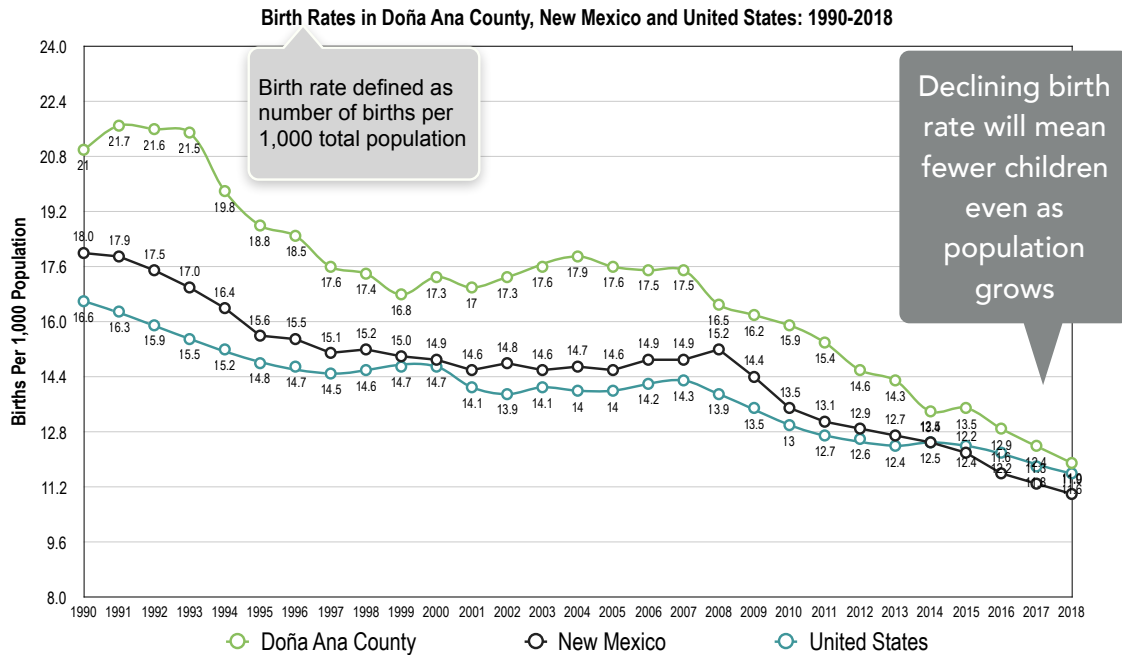

**In 2018 there were 736 fewer children born in Doña Ana County than in 2010- even though there were 8,289 more residents.**

## Immigration and In-Migration

### Immigration

**Exhibit 2-11**

*One-Year Change in Mexican Immigrant Population*

**Large Drop in Mexican Immigrant Population**

The population of Mexican-born immigrants dropped by more than 300,000 between 2016 and 2017, the largest drop in a decade.

Year	One-year change in Mexican immigrant population
2011	- 38,484
2012	- 109,245
2013	21,603
2014	129,512
2015	-71,191
2016	-69,618
2017	-303,767

Source: Pew Research Center, 2018

Historically, a high number of immigrants settled in the school district, and particularly in Sunland Park. In 2000, 35% of the district population and 43% of Sunland Park’s population were foreign born. In 2017, 9,210, or 29.7%, of the district population was foreign born. (Source: ACS, 2013-2017 5-Year Estimates)

The Pew Research Center reported that unauthorized immigration from Mexico (including South Americans) into the U.S. has declined by 1.4 million since its 2007 peak, after steadily rising since 1990, and authorized immigration from Mexico had fallen into negative territory by 2014. The Pew Research Center reported in 2018 that the Mexican immigrant population in the U.S. plummeted sharply in 2017, with losses over four-fold from those in 2016, up from just under -70,000 to over -300,000.

In 2018, the U.S. Census estimated that the number of residents who were not U.S. citizens in the Gadsden School District was 12,833, down from the 2016 estimate of 15,421.

### 2.3.4 Age Composition of Residents Living in the County and in the District

The U.S. Census estimates that in 2017, the district had 1,024 fewer children under the age of 5 than in 2010, but had 269 more school-aged children (aged 5 to 9). The number of GISD residents aged 20 to 34 (main child-bearing age) and over the age of 65 also grew from 2010.

In 2017, 32.5% of the district's total population was under the age of 19, down from a share of 36.5% in 2010. The share of population over the age of 65+ increased by 3.2% in 2015.

#### Composition & Births

There was a modest increase in the county population's share of people between the ages of 20 and 24 between 2010 and 2017, and that age group is fairly evenly split between males and females.

Though the share of county population over the age of 65 has increased since 2010, the change is not significant.

These factors indicate that the dramatic

#### *Exhibit 2-13 Population by Selected Age Group*

**Exhibit 2-12**  
*Doña Ana County Population Share by Age and Sex*

decrease in births despite the growth in population after 2000 cannot be solely contributed to a rise in either the “man-camp” nor the elderly population in Doña Ana County.

## GISD Community Growth Trends

### Chaparral

Chaparral was one of the fastest growing areas in population and student body, but Census estimates that growth turned negative from 2010 to 2017, with an average annual growth of -0.53%, down by -9.64% from growth in the 2000s. While La Mesa, La Union and Berino all saw average annual growth over 3% from 2010 to 2017, the growth rates in all subareas except Sunland Park have slowed since the growth of the 2000s.

### City of Sunland Park

Sunland Park had an estimated population in 2017 of 17,061 residents, an increase of nearly 3,000 persons since 2010. (Source: U.S. Census ACS 5-year Estimates, 2017)

### City of Santa Theresa

Santa Theresa grew by 19.74% annually on average from 2000 to 2010, but that growth rate plummeted to just 0.43% from 2010 to 2017.

### *El Paso County, Texas*

El Paso County had 800,647 persons in 2010 and an estimated 840,410 persons in 2017. (Source: U.S. Census 2017 Population Estimates) The Texas State Data Center projects that El Paso County will have a population of 889,003 by 2020, and 972,618 by 2030. (Source: Office of the State Demographer, Texas State Data Center).

---

## 2.4 Housing Development

### Housing Development

At least 1,927 building permits were issued in the district for new housing units from 1995 to 2015. The number of permits generally increased through 2011, but dipped in 2013, then rose again in 2014 and 2015. A major factor in the growth is building in Sunland Park. The following page contains a table of building permits by assignment area.

The Otero County portion of Chaparral has been more active in residential building than the Doña Ana County portion.

The ARC team collected data regarding housing development plans in the works in the GISD area. We compared planned developments with existing developments of similar housing type, density, and price range to develop estimated student projections for each project at complete build-out.

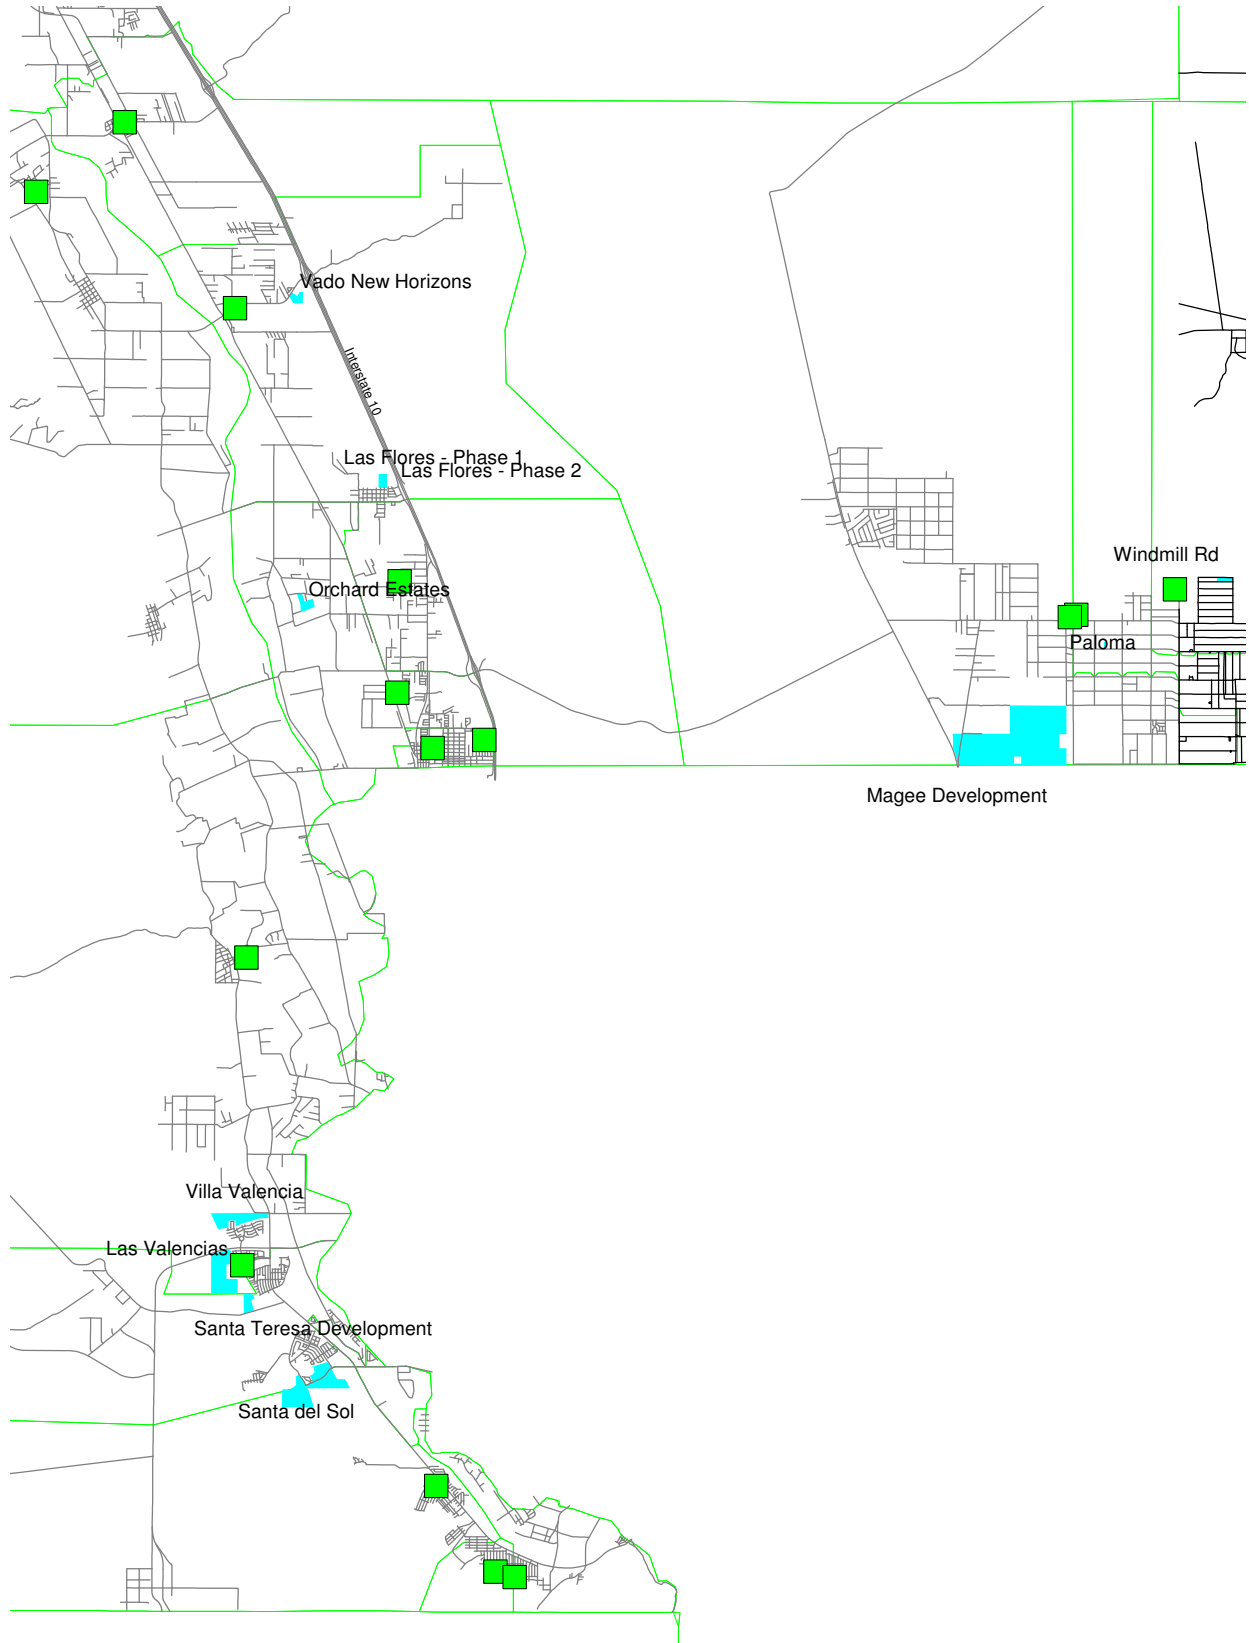

The following table outlines the model neighborhoods on which we based our estimates, and the table at the bottom illustrates our findings, including the time frame expected for each development, the number of projected students by level for each development, and the enrollment area those students will be expected to attend.

This material can be used by the district to measure future student production as the time frames for each of these developments becomes more definite in the future.

ARC mid-range projections, presented in this draft, consider each of these developments and integrates projected students from each during the projected time-frame, but we do so conservatively.

This material should serve as a guide to adjust enrollment projections as these communities develop quickly or become stalled.

Exhibit 2-16 GISD Planned Development Projected Student Production Model

## 2.3.6 Economic Trends

### Overview

Economic development in the “Borderplex,” which includes the cities of El Paso, Ciudad Juarez, and southern Doña Ana County, is diversified and dynamic. Doña Ana County total employment grew 2.3% per year on average from 1990 to 2011 and at 1.4% from 2010 to 2018.

State total employment reached a peak of 1.10M in 2008. Not until 2018, did jobs reach that level again, just topping it at 1.11M, signaling a slow recovery since the recession of 2008.

### Median household income

The U.S. Census Bureau’s American Community Survey (ACS) 2013-2017 estimated Gadsden Independent School District median household income was \$30,109, lower than the Las Cruces Public School District at \$43,114, but higher than the Hatch Valley School District, at \$21,840.

### Poverty Levels

In 2018, the ACS estimated that in GISD, 34.3% of households had income in the past 12 months below the poverty level. This total is higher than that of the Las Cruces school district at 17.3%, but lower than Hatch Valley school district’s total of 41.8%. (Source: U.S. Census, ACS 2013-2017). For GISD residents under 18 years of age, over half (54.4%) lived

in households that had income in the past 12 months below the poverty level.

### Employment and Unemployment

County employment grew by just over 10,000 jobs between 2008 and 2018, with an average annual growth rate of 0.28% during that time.

From 2010 to 2015, covered employment in Doña Ana County hovered around 86,500. Between 2015 and 2017, employment fluctuated before rising above the recent trend to over 91,000 in 2018.

Unemployment has fluctuated between 6,800 and 7,000 persons since 2012, but fell below 6,000 in 2018, however it still exceeds the state’s unemployment rate.

Comparing two different periods allows us to identify industry growth trends. From 2013 to 2015, the manufacturing sector lost nearly 450 jobs, transportation and warehousing gained 88 jobs, health care and social assistance grew by over 1,100 jobs and public sector jobs shrank by over 250 jobs.

More recently, between 2015 and 2017, manufacturing reversed losses to gain over 100 jobs, a potential sign that the industry is recovering. Transportation and warehousing picked up to gain close to 200 jobs indicating more robust growth in the sector.

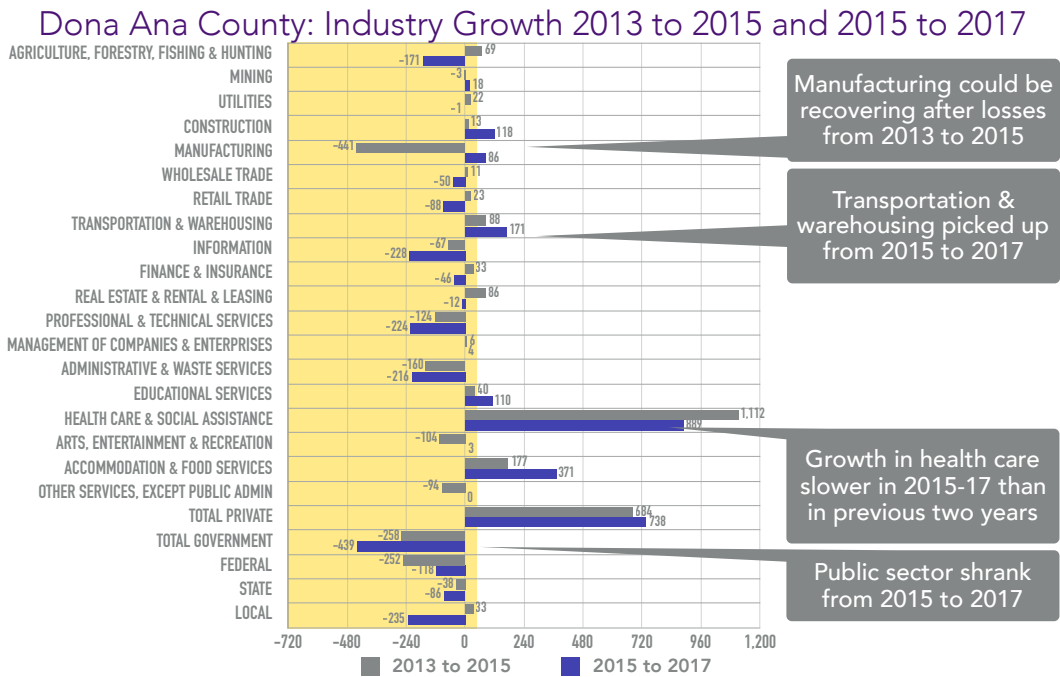

Health care and social assistance gained just under 900 compared to over 1,100 in

*Exhibit 2-17 County, State and U.S. Employment and Unemployment*

### Exhibit 2-20 County Employment Sector Chart

Source: U.S. Dept. of Labor, Bureau of Labor Statistics, Quarterly Census of Employment and Wages

the previous period, pointing to a potential slow-down in the health care industry’s rapid growth, though the industry is expected to continue to see gains in the coming years. Public sector jobs continued to take losses and at an even greater rate of close to 450 jobs in the two-year period for an overall loss over the whole four years of close to 700 public sector jobs.

#### Regional Trends

Virgin America’s Spaceport America is set to begin flight service in 2020 and has begun transferring staff and operations from its Mojave branch to Spaceport and Las Cruces, where the company set up headquarters in 2018. The company told New Mexico lawmakers they eventually expect to employ 128 employees, and Las Cruces will serve as the official gateway and the primary tourism and amenity destination for passengers.

Development of the Borderplex at Santa Theresa continues, though after 3 years of strong trade growth at the port, the volume slumped considerably after the direction of US trade policies began facing uncertainty in 2016. Development is expected to continue to grow in the future.

While both topics represent good news for the region and its economy, neither is likely to have significant effect on enrollment numbers in Gadsden schools.

#### *The Mesilla Valley Economic Development Alliance (MVEDA)*

*MVEDA* targets sectors in manufacturing and logistics, aerospace, renewable energy, business and financial services, technology, value-added agriculture, and digital media throughout the county.

## 2.4 Enrollment

The district maintains 16 elementary schools, four pre-kindergarten schools, three middle schools, four high schools, and one alternative school.

### 2.4.1 Historic Enrollment

District enrollment increased until a peak in 2010, and has steadily decreased since. Enrollment grew at an average annual rate of 1.4% from 1999 to 2005, and experienced an average loss of -0.94% per year from 2009-10 to 2019-20.

Middle and high school enrollment generally increased from 2000 to 2018, and elementary school growth began to fall after 2011.

### Early Childhood Education Programs

The four On-Track Pre-K programs in the district have grown substantially over the past four years. Growth is limited by the number of classrooms and state funding.

### 2.4.2 Enrollment Data

#### Historic Enrollment by Subarea

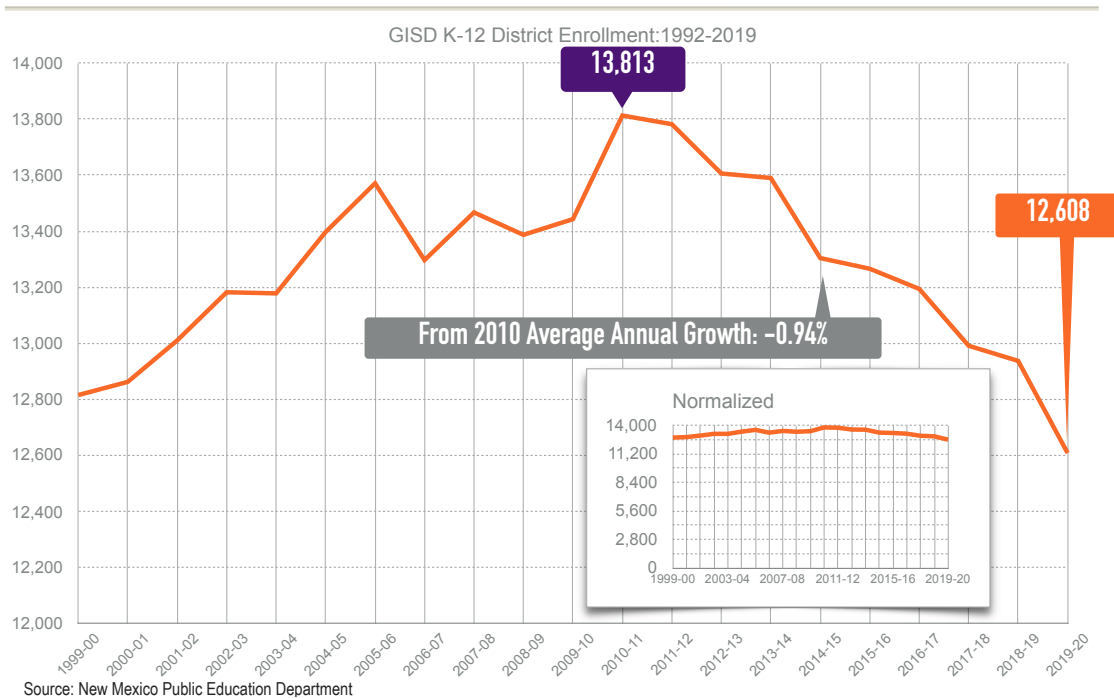

The following discussion divides the school district into four subareas to better track trends among schools that share similar geographic and community characteristics.

#### Historic Enrollment by Level

##### *Elementary Schools*

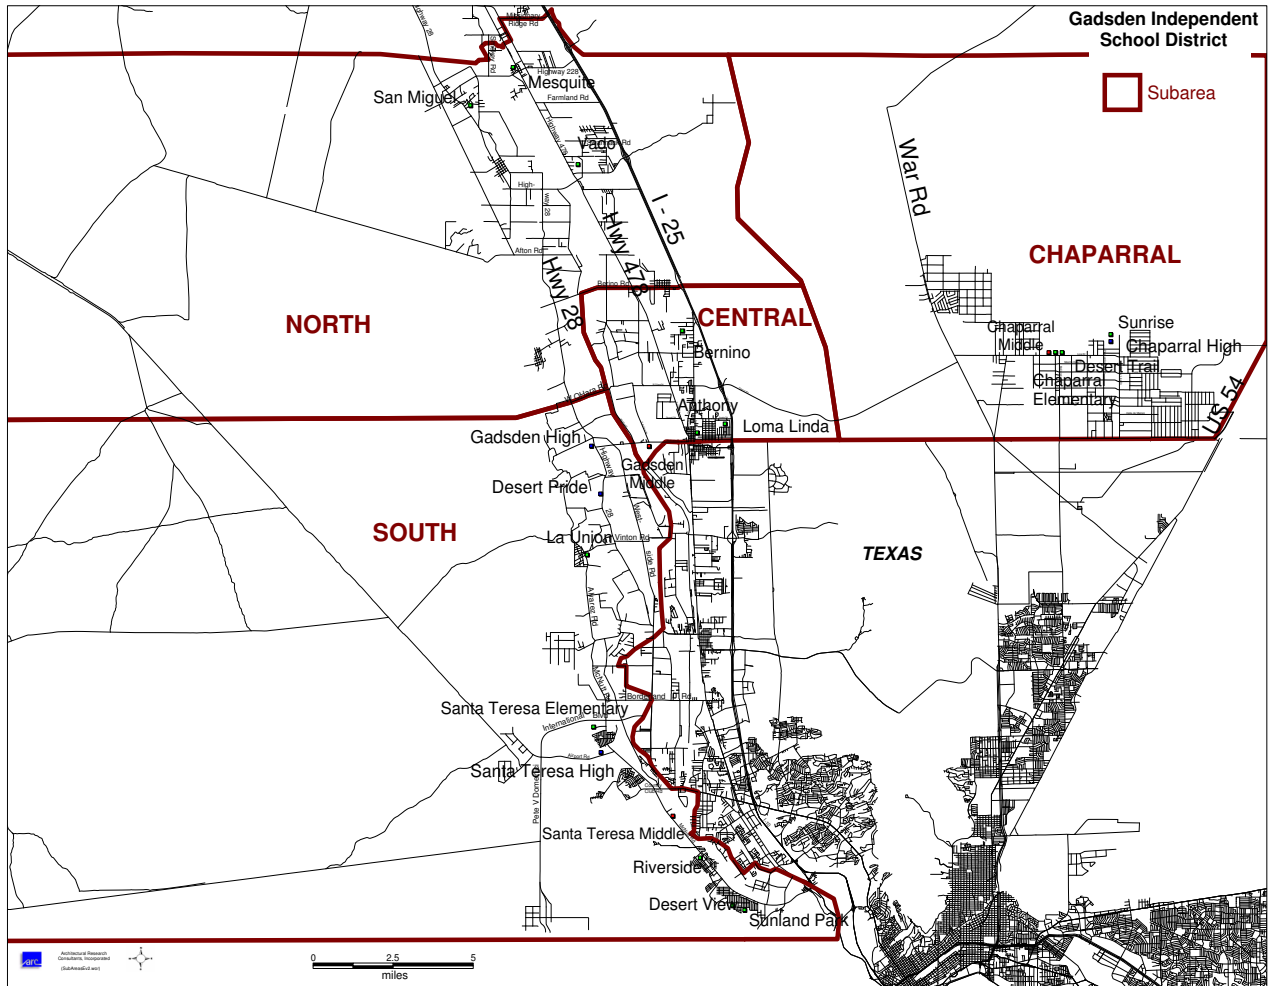

Enrollment in Gadsden elementary schools K-5th grades overall grew to a peak of almost

**Exhibit 2-21**  
*Total Historic K-12 Enrollment*

Source: New Mexico Public Education Department

*Exhibit 2-22*  
Gadsden School District Subareas

7,700 in the 2011-12 school year, but dropped by the 2019-20 school year to just below 6,550. Elementary school enrollment in all subareas areas has declined in the last decade

*Middle Schools*

Middle school attendance has been relatively steady since 1999, with a slight rise from 2009 to 2018. Although Santa Teresa Middle School is located in a growth area, it did not experience much growth. While Chaparral saw population decline since 2010, enrollment

grew. Gadsden Middle School enrollment has declined since 2005, but saw a slight uptick from 2017 to 2019.

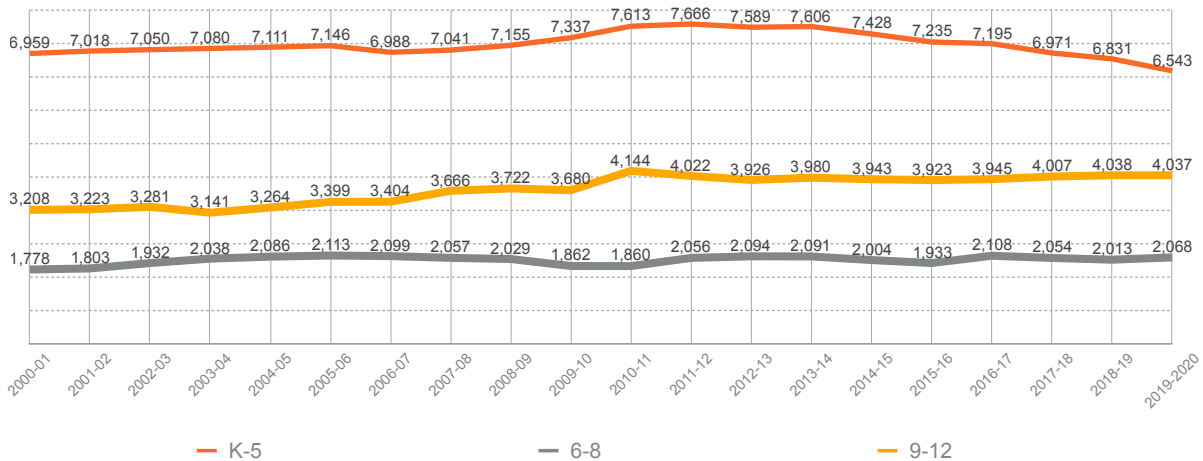

*High Schools*

High school enrollment has fallen lightly from a peak in 2010. Santa Teresa and Chaparral High School enrollments grew from 1999 and 2010. Gadsden High School experienced some decline, due to the reassignment of students from Gadsden High School to Chaparral High School upon

*Exhibit 2-24 Historic Enrollment by Level*

Chaparral's opening in 2005. All three high schools experienced stable enrollment from 2012 to 2014. Gadsden High School grew at a negative rate from 2009 to 2019 (-1.32% average annually), while Chaparral and Santa Theresa enrollment grew very slightly (1.37% and 0.09% average annually, respectively).

## Summary of Drivers of Future Enrollment

Multiple factors suggest declining enrollment:

- Declining births and birth rates
  - Decline in school-aged populations
- District population is growing, but the region has experienced a sharp decline in the growth rate.
- Even during the economic downturn, employment trends have been mainly positive in El Paso, and in Doña Ana County, Santa Teresa and Las Cruces. With Union Pacific and other major job-generators, southern Doña Ana County has performed better than other metropolitan areas in New Mexico.
- New housing development has been steady, although at a lower level of activity than in the past. However, activity is expected to remain steady or increase somewhat with subdivisions in the Santa Teresa and Chaparral areas, and grow somewhat in the valley.
- Fort Bliss expansion is complete, and White Sands expects no significant changes in the near-future.
- Ciudad Juarez maquiladoras are growing, generally improving the regional economy.
- Immigration of residents from Mexico to the U.S. has declined.
- From 2005 to 2010, GISD enrollment generally increased, but declined sharply

through 2019.

- Increased border tightening has diminished the seasonal worker population.
- Federal immigration policy changes are promoting a mass out-migration of Mexican immigrants and are tightening the border to limit the number of Mexican and South American immigrants entering the U.S.
- NAFTA has been re-negotiated (as the USMCA), but ramifications as yet unclear.

## 2.4.3 District Enrollment Projections

Most recent ARC projections were reflective of actual enrollment.

- Projections published in 2018 projected 2019-20 enrollment at 12,603; actual enrollment in 2019-20 was 12,608

District enrollment projections are based on a cohort survival method, which is the standard for projecting school enrollments. This method:

- Tracks the number of students in a cohort (a group of students in a certain age group who move together through one grade level to the next) through past grades.
- Calculates survival rates (ratios of the number of students who remain from one year to the next), based on historical enrollments.
- Calculates future enrollments using prevailing birth rates (for kindergarten) and average survival rates (for other grades).

As warranted, we adjust ratios to reflect major factors identified during the growth analysis. Factored into the projections were dynamics such as major new developments in the assignment areas, new school programs,

and new private or charter schools expected to attract current public school students. This method provides a projection range that typically incorporates future actual enrollment for five to seven years.

ARC projects elementary school (K-6) enrollment will decline slowly over the next 10 years, while middle school and high school enrollment will remain largely steady, even rising slightly in high schools.

According to the mid-range projections, regular elementary school K-6 enrollment will decline at a slow average annual rate of  $-.14\%$ , but will vary by subarea, with very slow decline in the southern part of the district, and some decline in the Central and North Subareas.

Based on these allocations, ARC adjusted the Subarea elementary school projections, as shown in the exhibit below.

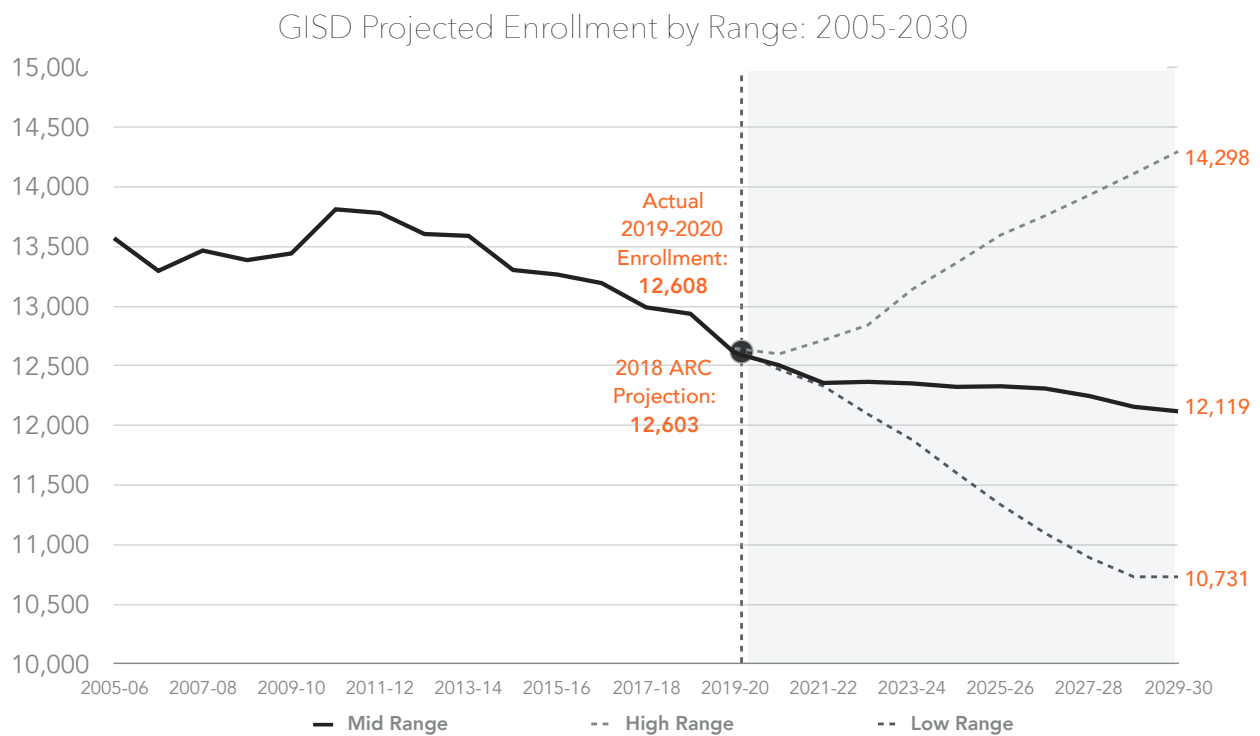

Tables and charts detailing historic and mid-range enrollment projections by subarea for elementary schools, as well as projections for middle and high schools, and by grade for the entire school district are included in the following pages.

## Conclusion

Current mid-range enrollment projections show continuing decline for the next several years following the previous four-year trend, then some recovery. Contributing factors include projections for increasing county population, expected stabilization in birth rates and employment increases bringing new residents into the district.

District enrollment will continue to decline as a result of low and recent declines in births and birth rates before experiencing slight

## 2.5 Utilization and Capacity

*This section identifies:*

- *Existing and projected classroom needs to accommodate projected enrollment*
- *Student capacity of each school site*
- *Special factors influencing classroom use*
- *Strategies to accommodate district needs*

### Summary of Changes

Yucca Heights Elementary School relieved crowding at Chaparral Elementary School, Desert Trail Elementary School, and Sunrise Elementary School. These schools now have student populations below 550, as directed by the district. However, Yucca Heights Elementary School has more than 550 students as shown in the 2019 40-day count.

The district should continue to monitor Yucca Heights although expectations are for a decrease in population.

The 2015 capacity study indicates a slightly declining student population in the Chaparral area through 2027. These schools have capacity for the current student population and room for additional students in each classroom, if that population unexpectedly increases before 2027.

### 2.5.1 Existing and Projected Utilization and Classroom Needs Analysis

See Section 4 Appendix for updated Utilization and Classroom Needs for Early College High School.

### 2.5.2 School Site Capacity

This section has no changes.

### 2.5.3 Special Factors Influencing Classroom Use

This section has no changes.

### 2.5.4 Strategies Considered to Meet Needs

This section has no changes.

---

## 2.6 Technology

This section has no changes.

---

### 2.7(1) Energy Management

This section has no changes.

---

### 2.7(2) Preventive Maintenance Plan

Please see the Appendix for the district's Preventive Maintenance Plan for 2019/20.

---

## 2.8 Capital Funding

### 2.8.1 Capital Funding History

Exhibit 2-52 shows an overview of projects since 2017.

## 2.8.2 Resources Available

Voters passed a G.O. bond in February of 2018 for \$38 million. GISD is currently bonded at 77% capacity. Each year, approximately \$9.5 million are allocated for capital projects and \$2 million in bonds are issued for educational technology notes.

RBC Capital manages GISD's G.O. bonds. The contact is Regina Gaysina, 6301 Uptown Boulevard, Albuquerque NM 87110, (505) 872-5992.

Berino ES	Wall and ceiling restoration		Jun-19	Need 11 month walk through
Chaparral HS	Pad for soccer bleachers		Jun-19	Need 11 month walk through
Chaparral HS	Wall and ceiling restoration		Jun-19	Need 11 month walk through
Gasden HS	Connect to city water main		Jun-19	Need 11 month walk through
Gadsden HS	New turf and track		Jun-19	Need 11 month walk through
Riverside ES	Playground wood chips		Jun-19	Need 11 month walk through
Santa Teresa MS	Bleachers		Jun-19	Need 11 month walk through
Santa Teresa HS	New turf and track		Jun-19	Need 11 month walk through
Vado ES	Wood playground chips		Jun-19	Need 11 month walk through
GAC	Entry remodel		Jun-19	Need 11 month walk through
Sunland Park ES	Re-roof, main building		Jun-19	Need 11 month walk through
Santa Teresa HS	Science Lab Renovations		May-19	Need 11 month walk through
GAC	Board room lighting		Mar-19	Need 11 month walk through
Gadsden HS	Swimming pool re-roof		Mar-19	Need 11 month walk through
Student Nutrition	Renovations for a training room		Feb-19	Need 11 month walk through

# 3 Capital Improvement Plan

*This section summarizes total capital needs identified by the district, addressing growth, renewal of existing facilities, technology, and educational and programmatic requirements.*

## 3.1 Total Capital Needs

This section has no changes.

## 3.2 Prioritization Process

### 3.2.1 Process and Criteria Used by the District to Prioritize Capital Needs

See Exhibit 3-1 for the updated GISD Capital Priorities.

### 3.2.2 Financial Strategies and Alternatives Considered

This section has no changes.

## 3.3 Capital Plan

PSCOC matching funds changed to 84% state match to 16% district match.

Exhibit 3-1 shows changes in this section.

District's priorities for projects and upgrades are for the following:

### 2018/2019

1. Desert Trail Elementary School HVAC lighting and refurbishment of ceilings and floors. This work is in process.
2. Loma Linda Elementary School HVAC and lighting. This work is in process.
3. Gadsden High School boys gym improvements. This work is in process.
4. Santa Teresa High School Science Labs renovations. This work is completed.

### 2019/2020

5. HVAC piping replacement at Chaparral High School, Sunrise Elementary School, North Valley Elementary School, and Santa Teresa Middle School. This work is in process.
6. Santa Teresa Middle School locker room addition and upgrades. This work is in process.
7. Desert Pride Academy kitchen completion. This work is in process.

### 2020/2021

8. Chaparral Middle School interior improvements.
9. La Union Elementary School HVAC upgrades.

### 2021/2022

10. Chaparral Middle School HVAC upgrades
11. Gadsden Middle School Renovations.
12. Chaparral High School bus lane paving

### 3.3.2 Yearly Update of Changes in Priority Projects for State Funding Assistance

The GISD Capital Plan is subject to review and revision, depending on the success of bond and mill levy elections, the construction climate, local and state economic conditions, and future local and state educational policies and requirements. The district may modify the recommended project priorities to bundle similar projects to generate savings or respond to unforeseen construction conditions, material availability, or costs.

The district may remove projects from the list or may realize savings in project implementation. It can also expect the bond funding to generate interest that can be applied to the Capital Implementation Program.

There is no guarantee that the district will generate the planned revenues. The district will revisit its funding strategy as conditions require.

## Exhibit 3-1 GIDS Capital Priorities

\*Aux Gym=MS/HS use

<sup>2</sup>For District Use only

<sup>1</sup>NMAC sf per student = 25 (9th-12th)

\*NOTE: A room is classified as a program space if the square footage is between 375 and 574 s.f. and is not a specialized CR (comp lab, science lab, etc.)

NOTE: Spaces between 575 and 650 are considered full-size classroom with limited capacity

NOTE: A space below 375 is not counted for capacity purposes
